OXNUMBER

Introducing OxNumber: The Future of Number Ownership

Welcome to the dawn of a new era in number allocation, where privacy meets convenience, and the power of ownership is back in your hands. OxNumber is revolutionizing the way individuals and businesses acquire and utilize numbers, from phone lines to virtual addresses, without the traditional barriers of KYC protocols.

Imagine a world where acquiring a number is as simple as making a crypto transaction swift, secure, and anonymous. That's the world OxNumber is creating. Our groundbreaking service empowers you to purchase numbers with the ease of crypto payments, maintaining your privacy while enjoying the benefits of a tangible asset.

Gone are the days of tedious verification processes and the relinquishment of personal data. OxNumber is your silent partner in the quest for discreet and autonomous control over your numerical assets. Whether you're an entrepreneur safeguarding your operations or an individual who prioritizes privacy, our platform is designed to serve your needs without compromise.

Invest in OxNumber, and join us on this journey to redefine number ownership. Our vision is clear: to build a world where every digital transaction upholds the highest standard of privacy and ease. With OxNumber, your next number is just a crypto transaction away.

Exclusive & Unique Aspects of OxNumber

Cryptocurrency is a fast paced and ever changing landscape when it comes to innovation. OxNumber wholeheartedly embraces the desire and commitment for continual growth and creating novel concepts and services to the DeFi sector.

Being an early adaptor allows us to have boundless avenues when it comes to presenting our product and ability to create a buzz when we hit the market. Listed below are some of the deciding factors that make OxNumber stand out and above what is currently on the market.

- First of its kind Telegram Bot that allow users to seamlessly create accounts for personal, business or collaborative endeavors across countless social media platforms
- Decentralized approach to media account creation. No KYC. Crypto friendly. No hassle.
- In addition to our phone number service, we will be adding a suite of tools and services to bolster the ease and simplicity of creating your dream media creation.

Revenue Share

Often, it's hard to judge the value of a utility if it doesn't generate revenue or have a tangible and measurable gauge for its usefulness. At OxNumber, we strive to produce products that can be measured by clear cut numbers and the volume of revenue it can generate.

We believe a prolific revenue sharing scheme will create the momentum and excitement for our project's longevity and mass appeal.

All profits from our platform services and fees will be distributed as follows:

80% will go toward \$OXNUMBER holders with a minimum holding of 0.3%.
Distribution will occur weekly

20% will go toward development and spearheading further products to
expand on our revenue generating services

Tax Allocation
A 5% tax will be implemented on each transaction.

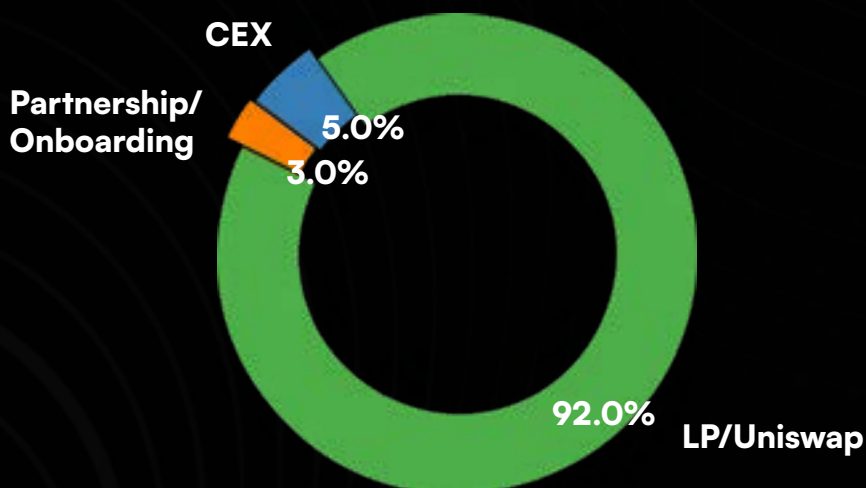

Tax Breakdown:

2% for further development of our platform

2% for marketing and advertising.

1% goes to ALL holders in the form of a reflection of our native token \$OXNUMBER

Tokenomics

ROADMAP

Phase 1

Conceptualization, Community Building, and Initial Development

Project Definition: Sharpen the core features and unique selling points of OxNumber, with a focus on the Telegram bot interface.

Community Engagement: Start cultivating a community on platforms like Telegram and Discord, highlighting the project's innovative approach.

Initial Technical Setup: Begin the development of smart contracts for the Ethereum blockchain and initiate the basic framework of the Telegram bot.

Phase 2

Advanced Development and Pre-Launch Strategy

Smart Contract Finalization: Complete the development of secure and efficient smart contracts for transaction handling.

Strategic Pre-Launch Campaigns: Implement strategic marketing initiatives to subtly build anticipation for the project without revealing too many details.

Technical Refinement: Enhance the Telegram bot's functionality, focusing on user experience and security.

Phase 3

Stealth Launch and Post-Launch

Stealth Launch: Execute the stealth launch of the project, surprising the market with the sudden availability of the service.

Post-Launch Marketing Push: Intensify marketing efforts post-launch to maintain momentum and attract a broader user base.

Market Performance Strategies: Implement tactics to manage and enhance market performance, focusing on stability and growth.

Phase 4

Beta Testing, Marketing Momentum, and Collaboration Foundations

Beta Testing of the Telegram Bot: Roll out a beta version to a select group of community members for feedback and refinement.

Influencer and Media Engagement: Start engaging with key influencers and media in the crypto space to generate indirect buzz around the project.

AI Collaboration Planning: Begin exploring potential collaborations with AI projects, identifying synergies and opportunities for integration.

Phase 5

Expansion, AI Integration, and Feature Enhancement

Platform Expansion: Expand the range of services and features offered by OxNumber, based on user feedback and market demands.

AI Project Collaboration: Initiate collaboration with an AI project, integrating advanced technologies to enhance service offerings.

Continuous Platform Improvement: Regularly update and improve the platform, incorporating the latest technological advancements and user feedback.

Phase 6

Long-Term Growth and Innovation

Sustained Engagement Strategies: Continue engaging with the community through regular updates, events, and interactive sessions.

Regular Assessments: Continuously monitor the platform's performance, user feedback, and market trends.

Adaptive Market Strategies: Remain flexible and responsive to market changes, adjusting strategies to ensure long-term success and relevance.
